

DSA in C++

Basics

Of C++

Lecture 01

Basic Doubts

10th tak ki maths $\rightarrow$ AP, GP, Log

C++ Language $\rightarrow$ 2+3 weeks

DSA

1st

No Prog Exp.

2nd

C++

3rd

Java, Python, etc, C

Myth $\rightarrow$ is C need. for CPP

- ✓ 2. Variables & Data Types
- 3. Operators
- 4. Input

Basics of C++ Part-1

Area/Formula on Google

Basic Program in C++

```
cout << "Hello PW";
```

Output

Hello PW

How to move in next line

```
#include<iostream>
using namespace std;
int main(){
    cout<<"Hello Akshit"<<endl;
    cout<<"Hello Anchal\n";
    cout<<"Hello Aastha"<<endl;
    cout<<"Hello Nihaal"<<endl;
}
```

Printing Text and Numbers

```
#include<iostream>
using namespace std;
int main(){
    cout<<18*2<<endl;
    cout<<"18*2"<<endl;
}
```

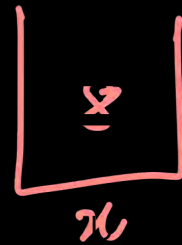

Variables (int) → Containers used to store some data

Code

✓ `int x;`

✓ `x = 8;`

✓ `cout << x;`

Output:

8

```
main()
{
    int x = 8;
    cout << x + 12 << endl;
    int y;
    y = 2;
    cout << y << endl;
    int a = 13, b = 9;
```

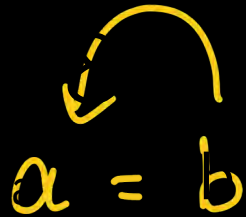

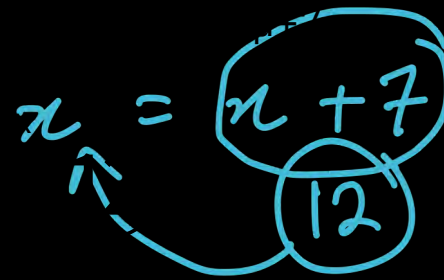

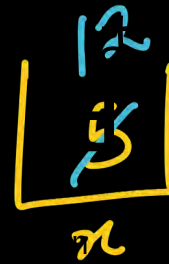

```
main()
{
    int x = 8;
    cout << x + 12 << endl;
    int y;
    y = 2;
    cout << y << endl;
    int a = 13, b = 9;
```

Modifying values of Variables

✓ `int x = 5;`

✓ `x = x + 7`

✓ `cout << x << endl`

$$x' = x + 7$$

b ki value a me aayegi. $0 = 7$ a

Output

12

//Comments
/*Comments*/
control command slash

```
// int x = 10;  
// cout<<x<<endl;  
// x = 9; // now x is no more 10. it is 9  
// cout<<x<<endl;  
int x = 9;  
// int x = 10; ERROR DEGA YE
```
